

CamEDGE MORE

The most universal, EDGE drive spiral system belt

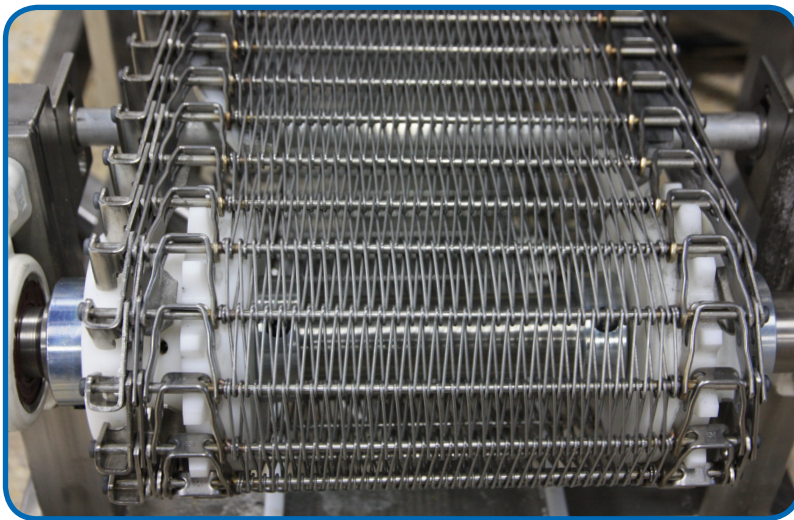

CamEDGE MORE

- Mesh Overlay Cageless spiral system conveyor belt
- Positively driven on the edge
- Low tension

Advantages

- Cageless design provides decreased footprint for MFO optimization
- Mesh overlay allows for greater product carrying capabilities, virtually eliminates product marking, and improves sanitation that withstands the hot water and chemicals without breaking down the integrity of the belt
- Edge Design and hold down tabs eliminate risk of failure due to belt flipping
- Custom configurations including: round, oval, In-Low/ Out-Low and In-High/ Out-High versatility
- Improved flexibility reduces: costs, placement limitations, maintenance, and installation time
- Positive drive eliminates high tangential tension

BeltTechSpecs

- Widths up to 48" (1219.2mm) excluding drive link extensions
- Speeds up to 100fpm (30.5mpm)
- Belt Material: Stainless Steel
- Belt Drive Link Construction: Asymmetric and Symmetric configurations
- Turn ratio: 1.6 x belt width
- Mesh Overlay up to 52 count
- Belt pitch equal to 1.33"
- Call Cambridge for special construction features and accessories like lane dividers and edge guards
